Ex : Give basic strength order for :

Sol. $3 > 2 > 1$

Ex : Aniline is less basic than alkyl amine, why ?

Sol. Due to delocalization of l.p. of nitrogen in aniline, aniline is less basic.

Ex : Which is weakest base :

Sol. (iv) due to resonance of l.p.

7. **Reactivity of benzene** : Characteristic reaction of benzene is electrophilic substitution (ESR)

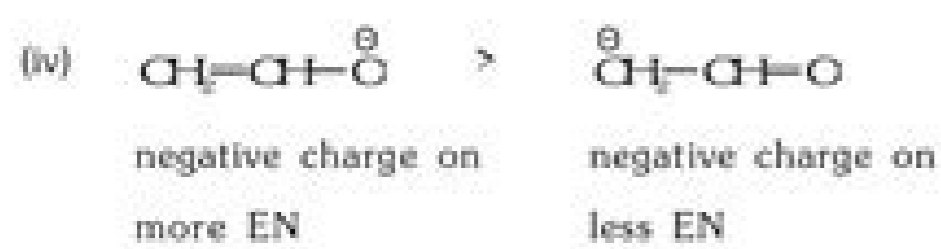

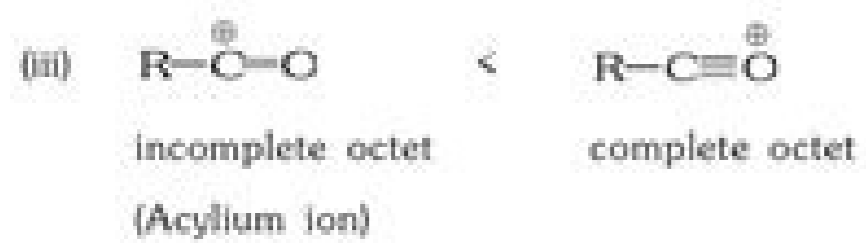

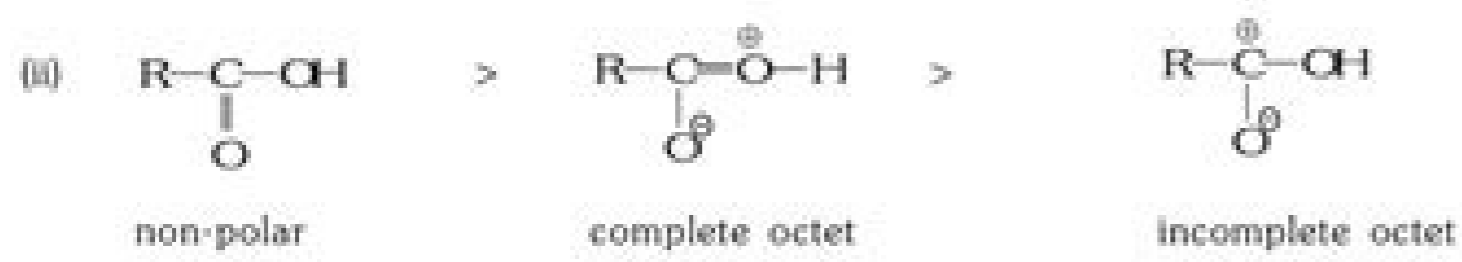

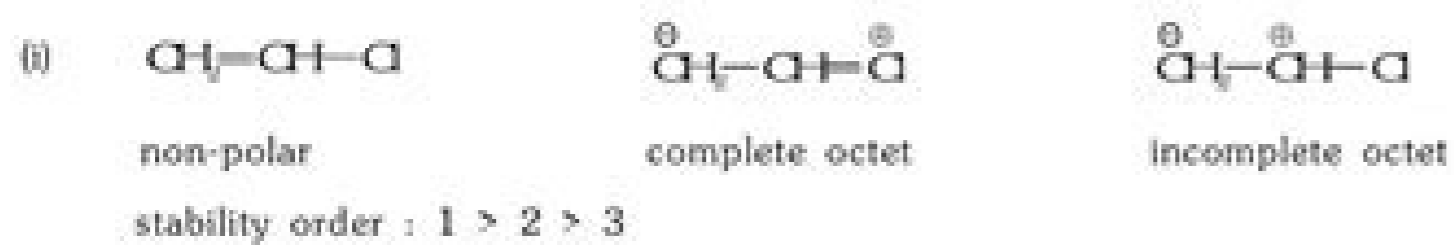

In benzene ring due to more electron density first attack will be of electrophile.

8. **Rules for stability of resonating structure (R.S) :**

- (i) Non-polar R.S. is more stable than polar resonating structures.
- (ii) In polar R.S. complete octet is more stable than incomplete octet.
- (iii) For incomplete R.S. positive charge on more EN is less stable.

Example : Arrange the following for stability order.
